

Fleet Manager, part of Trimble's Connected Farm™ solution, lets you track fleet locations and manage valuable information from the office or any location with internet access. Managers are able to transform their fleet performance by viewing time spent idling, moving, and traveling as well as delay reasons. Not only does this reduce the amount of fuel used, it also increases the amount of time vehicles are in productive use. By using Fleet Manager, you can maximize vehicle utilization and lower operational costs throughout your organization ensuring optimized fleet performance and ultimately, a better bottom line.

Benefits

- Easy to install hardware with “plug-and-play” capabilities for any mixed fleet
- Decrease fuel costs by reducing unauthorized vehicle use, curbing excessive speeding and lowering idling
- Identify activity that causes excessive carbon emissions such as speeding, excessive idling, and route deviation
- Reduce repair costs through proactive engine monitoring and maintenance
- Increase operator performance by monitoring productivity and delay reasons

Key Features

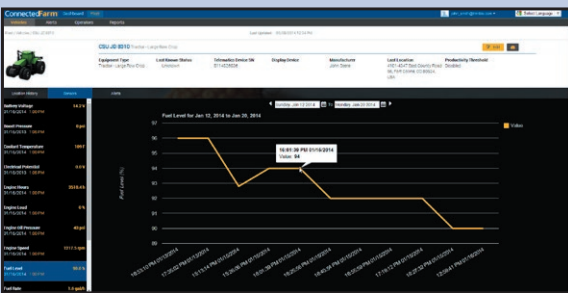

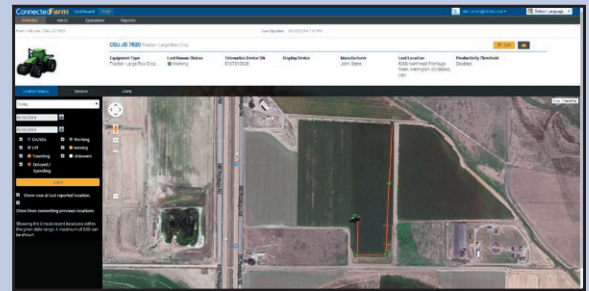

- Track fleet locations
- View historical positions
- Receive geo-fence and curfew alerts
- Monitor machine hours
- Access engine diagnostics for real-time machine health
- Capture time spent idling, moving, and traveling as well as delay reasons
- Analyze reporting on performance, utilization, and productivity
- Download data files from each vehicle

Vehicle Requirements

- Trimble® DCM-300™ modem
- Trimble FmX® integrated display (for delay reasons and file download features which requires Office Sync service)
- Trimble TMX-2050™ display (for file download feature which requires Office Sync service)
- Fleet Manager service

Fleet Positions and Alerts

- View fleet positions overlaid on background imagery with direction indicators.
- Identify current status of vehicles such as on/off, idling, moving, delayed, speeding, and traveling.
- Set up and monitor geo-fence and curfew alerts.

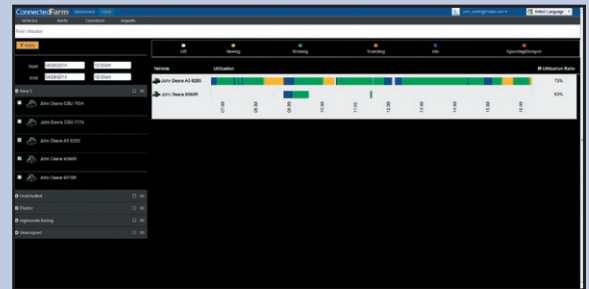

Fleet Health

- Monitor fuel usage, battery voltage, oil pressure, and other valuable diagnostics.
- Examine all vehicle health parameters using an easy to read table.
- View trends with vehicle health and performance graphed over time.

Fleet Utilization and Productivity

- Compare the utilization of each vehicle during a 24 hour period.
- Capture time spent idling, moving, working, and traveling as well as delay reasons.
- Analyze the time in which vehicles in your fleet are productive versus idle.

Scan to download the fleet app

Connected Farm Fleet App

- View fleet positions and status.
- Navigate to equipment from your current position using turn-by-turn directions.
- View geo-fence and curfew alerts.
